EURO TOOL – Your Source for Success™

Color coded handles!

PLR-726.15

PLR-726.30

PLR-726.35

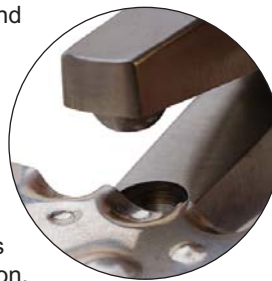

PLR-726.50

PLR-726.70

New and Exclusive from EURO TOOL, the Dimple Forming Pliers in sizes 1mm, 3mm, 5mm and 7mm. Easy to use, simply place the dimple at the point where you need it and press firmly. No need for a dapping tool and hammer. Make decorative shapes on soft metal or use to make scalloped edges. Two sizes (1mm and 3mm) are available with a "hooked jaw" to accommodate cuffed bracelets or textured surfaces. Each size has a different colored grip for ease of recognition. Let your imagination run wild. Recommended for soft metals 24 gauge or lighter (consider annealing metal before using).

Stock #	Description
