Hold it! *Eugenia C* Does it Again! New Holding and Soldering Tools

Eurotool
Exclusive!

Titanium Bezel Clamp

This is a multi-use tool for holding and soldering that allows you to match up the ends of bezel wire and hold them for easy soldering. No more worries about the ends coming apart or twisting--especially those thin ones. Made of Titanium, it is not a heat sync. Minimal serration for a nonslip grip. Loop handle allows for easy grip or attachment to third hand. No stress, no frustration.

Titanium Ring Shank & Bezel Holders

Made of 2mm Titanium wire, these lightweight bezel and ring shank soldering holders resist high temperatures. The square holder is great for holding down ring shanks when soldering. The oval holders are perfect for holding work while soldering bezels. These work best with a third hand (sold separately).

SUPREME Titanium Clamp and Holder Kit

This premium kit includes all three Titanium shank and bezel holders, a Titanium bezel clamp, and a third hand with weighted base.
